

The Solution To Providing
TMJ And Airway Treatment
At Your Practice

Hi Doctor,

I am a patient of yours and I want to introduce you to a company that is out to change health. They believe good healthcare starts with the connection of the mouth to the rest of the body. They also believe that breathing and sleep are the most important things I need in order to improve my health. Since dentistry's ability to improve breathing and sleep are unmatched, I need your help!

They have made a simple, digital workflow for any dental office that has an intraoral scanner to provide Ripple oral appliances. All they need to get started are upper and lower full-arch digital impressions, including the palate, and a closed bite registration. Ripple also makes a nasal dilator called the Airstrip. It takes seconds to scan my face with the Ripple iPhone app. After you send the scans to the Ripple lab, the Ripple products you recommend for me will be sent to your office in a few days.

If you'd like to learn more, please go to experienceripple.com where you can also register to become a Ripple provider for FREE.

Thanks and I appreciate your help!

One of your favorite patients :)
